### AldesConnect® Box Wi-Fi modem

EXHAUSTOConnect™ is a simple and user-friendly application that allows you to control and measure the comfort in your home and the quality of the air you breathe.

### PRODUCT BENEFITS

- The EXHAUSTOConnect® Box plug & play modem simply connects to the USB port on the ALDES product (except EasyHOME PureAIR).
- It is simple and intuitive to adopt thanks to the EXHAUSTOConnect® mobile app which accompanies users each step of the way.

### Principles of operation

Monitoring

Monitor your air quality at all times. Thanks to the VEX40T's intelligent control system and its precise sensors, it measures the CO2 level in your home, so you can follow developments in your air quality.

VEX40T is kept up-to-date with outdoor air quality and provides recommendations for filter selection.

Stay "connected"

Adapt the system to your needs. Use the app to easily programme the ventilation settings from wherever you are. Your EXHAUSTO system takes care of everything, so you can relax.

Customisation options

Whether you have guests, are on holiday or cooking, the unit settings can be adjusted accordingly.

"Remind me" function

The unit has a built-in filter monitor and therefore provides a warning when the filter needs to be changed.

### Product description

The EXHAUSTOconnect™ smartphone app for Android and iOS devices is a simple and user-friendly application that allows you to control and measure the comfort in your home and the quality of the air you breathe. Make life easier with your smartphone wherever you are.

The app works with VEX40T if it is equipped with a WAP communication module

### Installation

- Connect the EXHAUSTOConnect® Box to the product via USB (cable supplied) or over a wired connection (not supplied: cable 2 x 0.75 mm<sup>2</sup>).
- Via IBus: unscrew the cover of the AldesConnect® Box to disconnect the USB cable and connect the wire in its place (refer to your product operating guide for the location of the Ibus socket),
- Stick the two magnets on the back of the box (supplied with product) or screw the Box onto the wall or cupboard where the product is installed.
- During pairing: the wireless network must only be on the 2.4 Ghz waveband (see configuration of your internet provider box). Refer to the installation guide or the FAQ section.

### Reference arguments

Solution for connected dwellings

- The AldesConnect® Box is a wireless home automation modem which connects air purification and thermal comfort products to the Aldes-Connect® phone app (available on iOS and Android).
- AldesConnect® Box connects directly to the product over a USB or IBus connection and is available as an After-Sales accessory.
- AldesConnect® Box connects to your household wireless router to control your heating, ventilation or DHW tank at a distance.
- The following models are compatible: - air purifiers: InspirAIR® Side & Top, EasyHOME PureAIR Connect & Premium, - thermodynamic water heaters: T.Flow® Hygro+, T.Flow® Nano, - air/air heat pump T.One® AIR and triple-function T.One® AquaAIR.

### A11023386

#### AldesConnect® Box Wi-Fi modem

##### Main characteristics

###### Pairing

- You need an internet connection with a Wi-Fi router
- Activate the WLAN network on your smartphone to connect and follow the instructions in the app
- For pairing the Wi-Fi box must have 2.4 GHz (not only 5 GHz)
- Your internet network must not go through a proxy or authentication via CCU, or another validation (network that requires login/password)
- Press the modem key on the WAP communication module to start pairing.
- After pairing, you can take full advantage of your app.

###### Activation and settings

- Connect your WAP communication module via USB (supplied cable) or IBus (not included: 2 × 0.75 mm<sup>2</sup> cable) to your VEX40T
- Via IBus: Loosen the cover on the WAP communication module to remove the USB cable and connect it to the cable.
- For information on the location of the IBus connector, please refer to the product manual.
- Stick the 2 magnets to the back of the box (included with the product) or screw the box to the wall or cabinet where the product is to be mounted.

##### Supplementary characteristics

- The modem is delivered in a box with a USB cable and magnets for attachment to the product
- The operating mode of the modem is indicated by the two LEDs at the top of the modem (for more information, see the installation manual).

##### Contents of kits

- 1 AldesConnect® Box modem
- 2 magnets and 2 attachment screws (either may be used)
- 1 Installation guide
- AldesConnect® app, downloadable via App Store (iOS) and Play Store (Android)
