Duct silencer \varnothing 400 L=1000

Reference arguments

Compact acoustic silencer with rectangular casing and circular connections. It is due to the compact dimensions especially suitable for installation above convertible ceiling units or where space conditions are otherwise limited.

Constructed with a perforated inner tube and the soundproofing material is mineral wool. To avoid carry-over of the mineral wool, a polyester fabric is placed between the perforated tube and the mineral wool.

Tightness class ATC3 (C).

\varnothing 400 - 1000mm
