

1 ROOF DUCTS

Roof terminal

THFV250-600

THFV250-600, roof terminal for outdoor air inlet

Roof terminal for vertical air intake – used as end of the duct system above the roof. Attractive design, easy installation and low-noise design

PRODUCT BENEFITS

- Modern design
- Easy fitting
- Low-noise design

Product description

EXHAUSTO roof terminal THFV is for outdoor air intakes.

The roof terminals are for use where an architecturally attractive and technically sound roof termination is required for duct systems. The roof terminals are easy to mount on different roofing constructions.

The low-noise design makes them particularly suitable for built-up areas with high environmental requirements.

Fields of application

New, Refurbishment, Non-residential buildings, Schools

Dimensional data

C1	250
L (mm)	600
L1 (mm)	835
Ø C (mm)	370
Empty weight (kg)	14
Max. Dachneigung V (°)	30

Roof terminal

THFV250-600

THFV250-600, roof terminal for outdoor air inlet

Installation

Dimensions E, F and G apply only to PERFORM flashing.
With zinc, the flashing is always 100 mm.

PERFORM flashing can cater for +/- 2.5° relative to the given roof pitch.

THFV roof terminals are for outdoor air intakes with a round inlet, giving minimal pressure drop. THFV has an integrated bird net.

Dimensions E, F and G apply only to PERFORM flashing.
With zinc, the flashing is always 100 mm

PERFORM flashing can cater for +/- 2.5° relative to the given roof pitch.
